

TheConnector

Special Edition

Pointwise V16.03 Released - March 2010

Version 16.03 includes many exciting new features:

- Support for database solid and quilt import, export, creation, modification and direct meshing on these entities.
- A 64-bit build for Windows platforms.
- An API plugin that will allow users to define their own CAE solver export.
- Updated display attributes that are icon based and available directly on a new Attributes toolbar.
- Support for 3D mice for image manipulation.
- Periodic copies of connectors and domains.
- Many more additional new features...

This release also includes a number of patches for performance reports received to date.

You can read all about Pointwise V16.03 in the Release Notes:

www.pointwise.com/library/pw_ReleaseNotes.pdf.
