Survey on Glyph Scripting

Take our online survey to help us learn how much or how little you use Glyph scripting in Gridgen. As a token of our appreciation, five lucky folks will be selected at random from all valid survey respondents to receive a free T-Rex t-shirt!

You can find the survey here

www.pointwise.com/survey

use the traditional mouse with one hand to manipulate the software's user interface, your other hand uses the 3D mouse to push, pull, twist the model or scene in 3D space.

Learn about the benefits of a 3D mouse and more at www.pointwise.com/3Dmouse.

Pointwise Is Hiring

[Apply Today!](#)

We are currently seeking candidates for two future positions. First, a more experienced candidate is sought for our Applied Research Team to implement advanced meshing algorithms and create new research ideas and proposals. Second, we're seeking someone for our Product Development Team to implement new features in our Pointwise product.

For more details, see www.pointwise.com/jobs.

Know someone looking for a job? Refer them to our open positions. If that person is hired, we will give you a \$500 referral fee! Just have the person mention your name when they initially inquire about the position.

Pointwise Tricks and Tips

You can quickly find the distance between any two pickable points in your model using Alt + right mouse. The coordinates for each picked point are written to the Messages window along with the distance to the previously picked point. Since the Alt meta key is used for other purposes on a Linux system, use Ctrl + Shift + middle mouse on those systems.

Happy Meshing!!
