Platform Usage Survey - 2nd Notice

Thanks to everyone who responded to our survey request about the platforms on which you're running Pointwise and Gridgen. The data we've already received is giving us a clear indication of the platforms in which you're no longer interested.

We're going to leave the survey open in order to get as much data as possible so please complete the survey if you haven't already. Remember - we'll be drawing five names for a free thank you gift.

Here's the original announcement:

The types of workstations used for CFD preprocessing and postprocessing have changed greatly over the past decades. New platforms become available and older platforms fade away. Our software maintenance and new development is being negatively impacted by the need to support legacy platforms. Therefore, we are reaching a decision point on whether or not to continue support for older platforms, especially those that have already been end-of-lifed by the vendor.

You can help us make that decision by completing this survey so that we can have the most up-to-date data on the workstations you are currently using with Pointwise and Gridgen.

Please fill out the survey now at our web site:

www.pointwise.com/survey/.
